

Formelregister

Registeret inneholder en formeloversikt, bygget opp etter *Anatomisk terapeutisk kjemisk legemiddelregister for veterinærpreparater* (gul katalogdel), over aktive kjemiske substanser som inngår i de enkelte preparatene.

Uorganiske salter og organisk stoff med for komplisert eller ikke fullstendig klarlagt formel, er utelatt i Formelregisteret.

Systemets 5. nivå angir hovedvirkestoffet. For sammensatte preparater angis de øvrige virkestoffer alfabetisk.

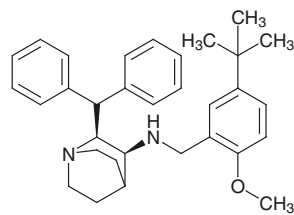

For nærmere opplysninger om registerets oppbygning og bruk henvises til forordet til *Anatomisk terapeutisk kjemisk legemiddelregister for veterinærpreparater* (gul del).
