

# Instruction movies and RMP materials<sup>1</sup>

## FELLESKATALOGEN

<sup>1</sup>RMP materials: Educational materials according to Risk Management Plan for a product.

## Would you like your instruction movies and RMP materials to be easy available for healthcare professionals and patients?

The pharmaceutical companies participating in Felleskatalogen can publish instruction movies and RMP materials on [www.felleskatalogen.no](http://www.felleskatalogen.no), with no additional costs.

Today (March 2020) there are more than 380 RMP documents and 160 instruction movies available on [www.felleskatalogen.no](http://www.felleskatalogen.no)

You find instruction movies and RMP materials easy available in the Felleskatalog texts, under the tab 'Pasientinformasjon' and directly included in the e-PILs. The pharmacy chains, The Norwegian Medicine Agency and The Norwegian Directorate of eHealth all show e-PILs from Felleskatalogen on their websites.

We also include instruction movies and RMP materials in our mobile applications, both for healthcare professionals and patients.

### Statistics

Every quarter year we send reports to the pharmaceutical companies, showing how many times their movies and documents have been shown on the website [www.felleskatalogen.no](http://www.felleskatalogen.no)

Please send an email to Bente By Jansen [bj@lmi.no](mailto:bj@lmi.no) if you would like to receive these reports. We send you these reports free of charge.

The total traffic in January 2020 on [www.felleskatalogen.no](http://www.felleskatalogen.no) was 2,8 million visits, and 6,6 million page views.

# Hizentra

CSL Behring

*Normalt, humant immunglobulin.*

ATC-nr.: J06B A01

● Står ikke på WADAs dopingliste

## How to proceed?

All pharmaceutical companies participating in Felleskatalogen can publish instruction movies and RMP materials on [www.felleskatalogen.no](http://www.felleskatalogen.no)

Please upload movies and documents to our SharePoint Media:  
[fk-web.felleskatalogen.no/sites/media](http://fk-web.felleskatalogen.no/sites/media)

Contact us at [manus.fk@lmi.no](mailto:manus.fk@lmi.no) if you need access to SharePoint Media.

## Instruction movies: Design and content

Our recommendations are based on:

<https://legemiddelverket.no/andre-temaer/reklame/veiledninger-for-reklame/veiledning-for-teknisk-administrering-av-legemidler-med-hensyn-til-reklamebestemmelsene>

Make sure that you only include information concerning administration (including preparation) in the instruction movies (or documents). All information shall be in accordance with the information in the package leaflets.

Do not include company logo or product logo, and do not point out positive features, for instance 'the product is easy to use'.

Based on universal design, we recommend both text and voice for movies, both in Norwegian language. English text is allowed in movies to be watched by healthcare professionals.

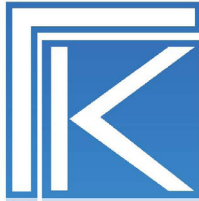

Please don't include background music. Music can be disturbing for people with hearing disabilities.

Our editorial staff may make minor changes to movies and documents, to ensure that our recommendations are followed.

## RMP materials: Design and content

The Norwegian Medicine Agency accept all RMP materials. The editorial staff at Felleskatalogen doesn't evaluate RMP materials further and do not change the pdf files in anyway. Please remember to name all RMP materials with 'RMP' when uploading into SharePoint Media.

The company is responsible for sending updated documents to Felleskatalogen, and our editorial staff will make sure to publish the updated documents in a few days.
