The Norwegian Pharmaceutical Product Compendium

FELLESKATALOGEN
The Norwegian Pharmaceutical Product Compendium (Felleskatalogen AS) is a private company owned by the Association of Pharmaceutical Industry in Norway (LMI). The company was established in 1958.

The mission of Felleskatalogen is to provide healthcare personnel with structured, updated and easily available information about pharmaceutical products on the Norwegian market. Healthcare personnel describe Felleskatalogen as an “essential source for product information”. We believe that knowledge about pharmaceutical products is critical for safe prescription and use of medicines, both for human and animals.

You should consider to participate because Felleskatalogen
• is the “number one” information source for healthcare personnel
• is the only source for electronic package leaflets
• is a well established company with good reputation
• gives you good expert help in preparing your advertising text

In this brochure you will find information about our information elements, information platforms and practical information about participation in our Veterinary compendium.

Please contact me for further information or questions.

I hope to hear from you soon.

Kind regards

Bente Jansen
Managing director and Chief editor

**Information elements**
The information we provide consists of package leaflets (PIL) and prescription texts mainly based on the approved summaries of product characteristics (SPCs).

We also give information about other topics like poisoning, vaccinating of animals and more.

**Platforms**
Information from Felleskatalogen is available two different platforms: Website and apps for smartphones/tablets.

**Website**
Please visit our website at [www.felleskatalogen.no/medisin-vet](http://www.felleskatalogen.no/medisin-vet)

The website includes all available information from Felleskatalogen and is free to use. Our five editors (all with a master’s degree) update the website on a daily basis.

**Apps for smartphones and tablets**
Information from Felleskatalogen is available in offline applications for Android, iOS and Windows 10. We update the information about the products in the apps incrementally, meaning that new information is downloaded when the app has access to wifi.
Participation in Felleskatalogen
When you participate in our Veterinary compendium, you ensure that updated information about your pharmaceutical products is easily available for both Veterinaries and the public. If you decide to participate, you will pay a fee every year in January (next invoicing in January 2020). This fee covers all costs; publishing of Felleskatalog texts and package leaflets. If you decide to participate, be aware that all your products available on the Norwegian market must be included in the Veterinary compendium.

Fee every second year
The fee is based on the number of lines in your prescription text in the printed compendium. The charge per line was 93 NOK in 2018.

If you decide to participate, the participation will continue until you eventually inform us to withdraw your products from the Veterinary compendium.
